

If possible, match grain/finish parallel to long edges

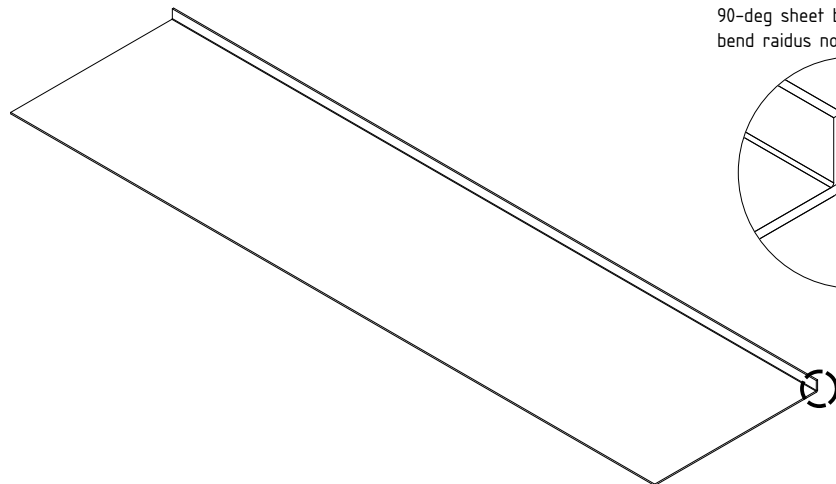

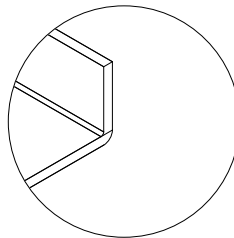

Mfg/application notes:

- 90 degree bend-radius non-critical dimension
- Corner fillets to avoid countertop cutting/slicing hazard
- 31.625in nominal width will sit flush with BBQ (sumerset TRL32)
- Outside dimension of 8x31.625 allow for 1/2in overhang on 3 sides.
- The 1/2in "lip" will be glued/sealed to back of BBQ
- The plate bottom will be glued/sealed to island countertop (ceramic tile)
- If possible, finish grain should run width-wise to match BBQ finish
- Material to match BBQ (16-gauge 304-stainless) and avoid galvanic corrosion

Bench-ground ok  
just break the corners

90-deg sheet bend  
bend radius non-critical dim
